

# Assignment 1: Introduction

Rachel Williams

## OVERVIEW

This exercise accompanies the introductory material in Environmental Data Analytics.

## Directions

1. Rename this file `<FirstLast>_A01_Introduction.Rmd` (replacing `<FirstLast>` with your first and last name).
2. Change “Student Name” on line 3 (above) with your name.
3. Work through the steps, **creating code and output** that fulfill each instruction.
4. Be sure to **answer the questions** in this assignment document.
5. When you have completed the assignment, **Knit** the text and code into a single PDF file.
6. After Knitting, submit the completed exercise (PDF file) to the appropriate assignment section on Canvas.

## 1) Discussion Questions

Enter answers to the questions just below the `>Answer:` prompt.

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I took an R focused biostatistics class that was focused on making graphs and analyzing numerical data. I have never used Github or Python, but have used excel.

2. Are there any components of the course about which you feel confident?

Answer: I am confident in inputting commands and datasets into R.

3. Are there any components of the course about which you feel apprehensive?

Answer: I am apprehensive about learning Python and doing independent work. I am good at following instructions but haven't created or used my own datasets before.

## 2) GitHub

Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file, committed those changes, and pushed them to your GitHub account.
